DST Capstone Project Details

Title and Topic Presentation

1. Prepare at least two topics with corresponding titles.
    a. Title Format: Use “Design and Development” at the beginning.
    b. Additional information for the topic presentation:
        i. Make sure the problem to be solved is stated.
        ii. Must be clear how database will be part of the solution.
2. Titles and chosen topics will be presented to the Capstone Teacher and Area Chairperson.
3. Accomplish the Application for Title and Designation of Adviser form. (4 copies)
4. Once signed, a designation will be issued to the assigned adviser.

Proposal Defense

1. Prepare the first three chapters of your manuscript: Introduction, RRL, and Methodology.
2. Presentation should include:
    a. Title
    b. Problem/s that you want to solve
    c. Objectives
    d. Scope and Limitation / System Features
    e. Technology to be used (language, framework, database)
    f. Possible entities and attributes
    g. Use Case
    h. Sample UI to illustrate the flow of the system
3. After defense, accomplish the Approved Capstone Project Specification form. This will reflect the approved title, technologies to be used, and concept. Include the list of recommendations from the panel as attachment.

SOPs for DST Capstone Projects

1. What is / are the problems identified in the current system / process?
2. How may the proposed system be designed and developed using the <selected methodology> in terms of the following phases:
    2.1 ... phases of the selected methodology
3. How may the database of the proposed system be designed and developed in adherence to the Database Life Cycle?
    3.1 ...

source: https://medium.com/informatics/the-database-life-cycle-4151969ca57d

4. How may the proposed system be evaluated by IT consultants based on the following ISO/IEC 2010 criteria:

4.1 functional suitability;
4.2 performance efficiency;
4.3 compatibility;
4.4 usability;
4.5 security;
4.6 maintainability?

5. How may the proposed system be evaluated by end-users based on the following ISO/IEC 2010 criteria:
5.1 functional suitability;
5.2 performance efficiency;
5.3 compatibility;
5.4 usability?
